BRITAIN'S BEST KEPT SECRET IS OUT!

Session is Europe's No. 1 range of guitar amps – and they are in the U.S. now! Speakers that are custom made by Celestion and Fane; the famous Accutronics 3-spring reverb, and a 2-year warranty are some of the more obvious signs of excellence. But what really explains why Session has achieved its amazing reputation throughout Europe is the *sound!* Designed by guitarists for guitarists.

The 90 Watt **Sessionette** packs a staggering punch from a compact, lightweight combo and has many really useful features – like the 3-switch illuminated foot controller; the facility to mix the clean and dirty sounds, and the swept filter to change the character of the dirty channel. All with that real tube sound. Two guitarists can use the **Rockette 30** simultaneously! Bass players – check out the new 100-115 bass combo and find out why its list of users reads like an almanac of rock music! No. 1 for value.

MIKE RUTHERFORD (GENESIS/MIKE AND THE MECHANICS) • TOM ROBINSON BAND •

The presence of an artist's name on this list does not constitute an endorsement. To the best of our knowledge each of these artists has been supplied with purchased Session equipment for live or studio use.

Above: An early advert run by our American distributor. It was very important to show players who were already using our amps, so the ad was bordered by their names.

Right: This was the advert run to 'launch' the Rockette:30. It was met with great approval. The headline was to draw attention to the fact that it was probably the first amp in this budget category to be equipped with channel switching and included the footswitch in the retail price (although in error the ad says not).

We contacted a small number of dealers and obtained advanced orders from them for the first production run. So, all the amps were actually sold before we ever made any! In return, we published the contact details of those dealers in the main advert.

We've taken the lead... and put it with the rhythm.

THE NEW ROCKETTE 30 FROM SESSION HAS ALL THE FEATURES YOU WOULD EXPECT FROM A TOP QUALITY AMP AND A FEW YOU WOULDN'T. IT BOASTS A UNIQUE FEATURE WHICH ENABLES TWO GUITARISTS TO PLAY SIMULTANEOUSLY. ONE SELECTING A LEAD OVERDRIVE SOUND WHILST THE OTHER CAN ALTERNATE BETWEEN OVERDRIVE OR CLEAR RHYTHM.

IF YOU ARE LOOKING FOR AN AMP THAT FITS YOUR NEEDS AND YOUR POCKET, GO FOR THE ROCKETTE 30 FROM SESSION.
