## Buy A Morley. And Step On It.

Product Catalog

Some pages from the Morley brochure showing the British Award-Session made JD10, AP10, MM4 and MatchBox DI boxes.

Until 2000, we were the UK distributors for Morley pedals. Morley is owned by the Marmon Group in Chicago, USA. The Factory where the pedals are made in Cary, Illinois, is also home of the famous 'Accutronics' reverb spring units which are used in many of the worlds amplifiers. They are both part of the same company.

### Pro Gear

**JD-10** JERRY DONAHUE JD-10  
Suggested Retail \$198.00

This Swiss army knife of pedals is an overdrive/distortion, direct box, preamp, speaker simulator, Humbucker emulator, EQ, line driver and Headphone amp. For use in live, direct or recording situations. Drive depth, Output level, G12T speaker simulator, three band EQ and Rock/Classic boost switch allow you to OWN YOUR TONE! AUTOSENSE™ circuitry allow any adapter 9 to 30 volts DC to be used, the JD-10 senses the voltage and polarity and adjusts AUTOMATICALLY! This is one pedal you can use in ANY situation; don't be caught without it. Two year warranty.

**AP-10** ACOUSTIC PREAMP (AP-10)  
Suggested Retail \$198.00

This acoustic preamp /direct box is specifically designed for instruments equipped with piezo pickups. Allows for tone control in live, direct or recording situations. HORNSAVER™ switch saves high frequency horns from potentially damaging tones above 6K. AUTOSENSE™ circuitry allow any adapter 9 to 30 volts DC to be used, the AP-10 senses the voltage and polarity and adjusts AUTOMATICALLY! Output, Master output, 3 band EQ, Hornsaver and gain select switch give you the acoustic control you've been looking for. Two year warranty.

**MM-4** MIX & MATCH (MM-4) - Suggested retail \$140.00

Four channel low noise mixer specifically designed for stringed instruments. Mega-Z™ ultra high impedance inputs eliminate the tone and volume losses common with conventional mixers. Each channel has its own level control with a master control for the entire unit. PAF tone™ switch allows piezo pickups to emulate humbuckers. AUTOSENSE™ circuitry allow any adapter 9 to 30 volts DC to be used, the MM-4 senses the voltage and polarity and adjusts AUTOMATICALLY! Two year warranty.
