

BB22 & BB45 Chassis Dimensions

The BB22 and BB45 chassis will NOT fit into a SESSIONETTE:75 cabinet, or any other SESSION amplifier cabinet.

In order for the complete chassis to fit into your own custom cabinet, you will need to have a total space of: L415 x W160 x H67mm for the chassis. You will also need to allow space for the reverb tray: L240 x W85 x H40mm.

12" speakers vary in height from about 123mm upwards, so please do not forget to allow enough space for your chosen speaker to clear the chassis.

Most AlNiCo speakers are too deep to fit the standard BB cabinet and clear the chassis.
